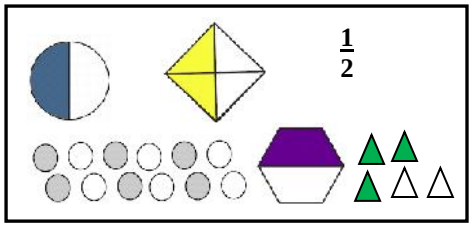
Fraction Posters



Materials: pattern blocks, fraction kits, counters, coins

1. Work with a partner. Select one of the following fractions:

$$\frac{1}{2}, \frac{1}{3}, \text{ or } \frac{1}{4}$$

2. Use different materials to show the fraction you chose. Draw each example on a poster. Include one ‘trick’: an example that is not the fraction you chose.

3. Swap posters with another group and look for their ‘trick’. Explain why this fraction does not belong on the poster.
